

C.O.M. Yardage Requirements - Production could be delayed if insufficient C.O.M. yardage has been sent. Basic C.O.M. yardage requirements per chair are listed under each style in our price lists. These yardage requirements are based on 54" wide goods in solid patterns (no repeat). If your C.O.M. has a pattern or a stripe and/or is less than 54" wide, add the percentages below to the basic C.O.M. yardage requirements given in our price lists to determine the amount of yardage needed per chair:

Fabric Width	Plain Fabric	2"- 14" Repeat	15"-24" Repeat	25"- 27" Repeat	28"- 36" Repeat
54"	0%	20%	25%	30%	35%
50"	15%	25%	30%	35%	40%
48"	20%	30%	35%	40%	45%

The percentages in the chart above are the best estimates that can be provided given the various fabric pattern layouts that fall within fabric repeat scales. We are happy to provide a more accurate yardage quote per your specific C.O.M. fabric. To provide this special service, we will require that a sample of your C.O.M. fabric be sent to us (min. of 1 full yard) showing the complete layout and repeat scale of the pattern. Please contact our customer service department to get detailed instructions on how to request this service before sending the C.O.M. fabric sample. The fabric sample can be returned after we have completed the measuring and yardage calculations.
